M. Abdullah Shahab

SENIOR SOFTWARE ENGINEER · .NET / ANGULAR

ashahab315@gmail.com abdullahshahab.dev linkedin.com/in/shahab0123 github.com/shahabghouri
Wah Cantt, Pakistan · **Remote-ready**, PKT (UTC+5) · 09:00–23:30, up to 02:00 for US overlap

PROFILE

Senior Software Engineer with **7+ years** shipping full-stack products on **C#, .NET Core, and Angular** — from microservices architecture and payment integrations to **LLM-powered SaaS products** with production prompt pipelines. Comfortable owning features end-to-end — system design and API development through production support — and experienced working async with US and UK stakeholders and leading small engineering teams.

EXPERIENCE

Vetted Freelance Developer · Toptal network
Oct 2026 – Present
Remote

Accepted into Toptal's Top 3% talent network after its screening process. Available for freelance .NET and Angular engagements.

Senior Software Engineer · Infigo Solutions
Jul 2024 – Sep 2026
Islamabad, PK — US partnership account + internal R&D

- Shipped cross-platform features across **React Native, Angular, .NET Core, and SQL Server** stacks on concurrent client projects.
- Resolved production support tickets across multiple client products while maintaining feature velocity.
- Collaborated daily with US-based engineers through async workflows and overlap standups.

Senior Software Engineer · Ark IT Services
Sep 2021 – Jul 2024
Islamabad, PK · 2 yrs 10 mos

- Engineered core microservices for **Moneypex**, an accounting SaaS built on **.NET + Angular**.
- Designed and delivered a **Rental Management System end-to-end** on .NET + Blazor WebAssembly — authentication, multi-tenancy, and reporting.
- Integrated **GoCardless, Stripe, and PayPal** for recurring and one-off payment flows across Moneypex.
- Eliminated manual inventory reconciliation by building the **Moneypex POS ↔ WooCommerce** sync, unifying online and in-store sales.
- Delivered **FlickHoliday** and **RahimBah.com** end-to-end for a London-based client, working directly with UK stakeholders.

Software Engineer · ISLO Technologies
Apr 2020 – Aug 2021
Rawalpindi, PK · 1 yr 4 mos

- Full-stack engineer across multi-tenant ERP platforms — Campus Management, Office Management, and LMS — on .NET Framework, ASP.NET MVC, and Angular.
- **Led a team of 10+ junior developers** on client deliverables, owning sprint planning and code review.

Junior Software Engineer · Copains Solutions
Oct 2019 – Apr 2020
Rawalpindi, PK

- Shipped Gym, School, and POS management ERPs on ASP.NET MVC, jQuery, and JavaScript.

Software Engineering Intern · SAUFIK
Jul – Sep 2018
Islamabad, PK

CORE SKILLS

Backend

C# · .NET Core · ASP.NET MVC · Web API · Microservices · Ocelot · RabbitMQ · SignalR · IdentityServer4 SSO · Entity Framework · Event-driven architecture · Multi-tenant SaaS

Frontend

Angular · React · Blazor · Next.js · React Native · TypeScript · JavaScript · Tailwind CSS · Capacitor · Microfrontends

Data

SQL Server · MySQL · SQLite · Firebase

Cloud & DevOps

Azure · Google Cloud · AWS · S3 / ECS / ECR / ELB · Docker · TeamCity · GitHub Actions · CI/CD pipelines

Payments & Integrations

Stripe · GoCardless · PayPal · WooCommerce · Jira / VSTS

AI Engineering & Tooling

LLM Integration · OpenAI API · Claude API · Prompt Engineering · Structured Outputs · Claude · Cursor · GitHub Copilot

EDUCATION

BS Software Engineering
International Islamic University, Islamabad
2015 – 2019 · CGPA 3.45 / 4.0

DOMAINS

AI · Education · Fintech · Healthcare · Travel · Advertising & marketing · SaaS

7 yrs: .NET, C#, Angular, JavaScript, Microservices, SQL Server. **2 yrs:** LLM integration. **1 yr:** Claude Code.

LANGUAGES

English — Professional
Urdu — Native

CAREER SNAPSHOT

7+	10+	3	4
Years of full-stack engineering	Products shipped to production	Payment gateways integrated	Client products built solo, end-to-end

SELECTED PROJECTS

Scholync — Case study

SCHOOL MANAGEMENT SAAS · LEAD DEVELOPER

13-module school management platform — **student information, fees, attendance, exams, and communication** — with LLM-backed AI features integrated into core workflows.

Moneypex — moneypex.com

ACCOUNTING SAAS · SENIOR DEVELOPER

.NET microservices + Angular accounting platform with multi-currency support, invoicing, and integrated payments via GoCardless, Stripe, and PayPal.

AvaGen.ai — Case study

AI AVATAR VIDEO PLATFORM · SOLO BUILD (MVP)

Built solo for a UK client — **.NET + Angular** MVP for AI avatar creation, video generation and editing, and publishing to five social networks, with **OpenAI and Claude** script generation and a **GitHub Actions CI/CD** pipeline to IIS. No longer live.

RahimBah.com — rahimbah.com

PROPERTY INVESTMENT LMS · SOLO BUILD

End-to-end LMS tailored for UK-based property investors, **delivered solo** for a London client from requirements to launch.

FlickHoliday — flickholiday.com

HOME-SWAP APP · SOLO BUILD

Home-swap application with **matching, messaging, and booking** flows, built and shipped end-to-end.

ConnectLMS — connectlms.com

VIRTUAL CLASSROOM + LMS · TEAM LEAD

Led **10+ junior developers** building a **virtual classroom and LMS** used by educational institutes, as part of a multi-tenant ERP suite.

EZAutism — ezautism.com

CLIENT BUILD · SOLO

Built solo for a client, as sole developer across the full lifecycle: an online **Autism & ADHD diagnosis** platform that lets families take the first step of the intervention journey from home.

Additional work: Rental Management System (.NET + Blazor WebAssembly) · Campus / Office / School ERPs · Moneypex POS (WooCommerce) · FitZone · Learnify With Aleem. References available on request.

HOW I WORK

— End-to-end ownership

Comfortable taking a feature from architecture and data design through implementation, release, and production support — including four client products delivered solo.

— Leading small teams

Led a team of 10+ junior developers on client deliverables — sprint planning, code review, and unblocking — while staying hands-on in the codebase.

— Async, cross-timezone collaboration

Years of daily work with US and UK stakeholders across PKT overlap hours: written-first communication, clear handoffs, and overlap standups.

— AI-augmented delivery

Use Claude, Cursor, and GitHub Copilot as everyday tools to speed up implementation, refactoring, and review without compromising code quality.
